functionaries in the military machine must be measured and provided to meet the requirements of the task. It is really the estimate of the task then that should determine the measure of efficiency that must be conditioned. Minor tasks allotted to the hosts of the fighting machine are widely varied but the major task is the same for all. So while qualifications for minor tasks require specialization, fundamental qualifications are uniform. To illustrate the captain's specialty is that of control through the exercise of command; the gunner's specialty has to do with the manipulation of guns; neither the captain nor the gunner is expected to be qualified for the other's specialty. The great task for both is

Thorpe's, 1986. In 1917 when the author Lieutenant Colonel George C. Thorpe USMC published an unusual little book entitled *Pure Logistics: The Science of War Preparation*, the word logistics was not particularly understood nor even generally used in the United States. Thorpe indeed may well have been one of the few military thinkers anywhere in the world to employ the term prominently at this time and almost certainly the only one to attempt to define it carefully as a science. Thus his thoughtful and perceptive analysis stands out as a milestone between the ground-breaking treatise of Jomini published nearly a century earlier and later writings on logistics that did not begin to appear until about the time of World War II. More importantly, Thorpe's effort to define logistics was more than just an academic exercise. A proper definition, he argued, was essential for understanding the true role and function of logistics in war, for ensuring that none of its aspects were neglected and for achieving ultimate victory in any conflict. As Colonel Thorpe suggested, logistics has had a long neglected and often misunderstood history. Part One: Logistics. 1. Definition. 2. Russian Campaign. 3. Atlanta Campaign. 4. German Army. 5. National Organization of Fighting Forces. 6. Naval Organization. 7. Army Organization. 8. The Fighting Machine. 9. Peace Time Logistics. 10. Factory Preparedness. 11. Logistical Problem. Part Two: Education.
