Pulp's This Is Hardcore Jane Savidge, 2024-03-07 Essential reading plain and simple Cult Following Savidge knows the album backwards UNCUT This Is Hardcore is Pulp s cry for help A giant sprawling flawed masterpiece of a record the 1998 album manages to tackle some of the most inappropriate grown up issues of the day fame ageing mortality drugs and pornography and still come out crying and laughing on the other side The subject of pornography dominates the record from its controversial artwork to the images conjured up by songs like Seductive Barry and the title track after Pulp s main man Jarvis Cocker who d spent most of his teenage and adult life chasing celebrity only to be cruelly disappointed when it finally arrived in spades hit upon the grand notion of using pornography as a metaphor for fame The album s commercial failure as a follow up to the band s Britpop defining Different Class also symbolizes a death knell for Britpop itself Dark right Except just like Pulp themselves Jane Savidge s book is playful and sometimes very funny indeed Kicking off with an imaginary conversation between Jarvis Cocker and the people who run the Total Fame Solutions helpline Savidge expertly guides us through the trials and tribulations of an album that begins with the so called Michael Jackson Incident when Cocker got up on stage at the 1996 Brit Awards and waggled his fully clothed bum at the King of Pop Pulp s This Is Hardcore may be a sleazy run through porn and mental demise and an album that chronicles Cocker s continuing disillusionment with his newfound lot in life but Savidge s book assesses the cultural and historical context of the album with insider knowledge and a sharp modern lens ultimately making a case for it as one of the most important albums of the 1990s

Chemical Technology F. A. Henglein, 2013-09-11 Chemical Technology is based on lectures the author gave at the Technische Hochschule of Karlsruhe and at the University of Freiburg Part 1 of this book deals with chemical technology and describes subjects dealing with apparatus unit operations and chemical economics The text reviews industrial chemical reactions raw materials preparation for reaction thermal and catalytic processes and a history of chemical technology This part also addresses transportation storage of raw materials and the design and construction of a chemical factory Part 2 concerns special chemical technology including topics such as raw material upgrading processing of products

in the chemical industry and unit processes application toward consumer goods production This part reviews materials sourcing from animals minerals and vegetables such as processing of products from living organisms the recovery of sugar starch and other carbohydrates The book also reviews products of the chemical industry including low molecular weight consumer goods detergents aromas explosives plastics elastomers synthetic leather textile and some building materials Chemistry students chemical and process technology students and mechanical engineering students with interest in chemistry will find this book valuable Cellulosic Pulps, Fibres and Materials J F Kennedy, Glyn O. Phillips, Peter A. Williams, 2001-10-31 Based on the proceedings of the 10th international Cellucon Conference held in Turku Abo Finland this book offers a comprehensive overview of research undertaken in all aspects of cellulosic pulps fibres and materials including the production and processing of pulp and paper fibre **Pulp and Paper Magazine of Canada** ,1922 The industry of nations Industry, 1855 Citrus Processing Dan A. Kimball, 2012-12-06 Citrus juices constitute the majority of the fruit juices consumed in the United States and around the world Along with the rest of the fruit juice industry they play a major role in the entire food industry as well In spite of this prominence few texts have been written on quality control technology and most of the texts have been written by researchers who may possess great technical skill but generally are less familiar with daily routine quality control problems and concerns than quality control technologists are On the other hand quality control technologists and managers generally do not have the time and or the talent to write books or communicate through scientific literature The author recognized the need for an updated comprehensive and easily understood text on citrus quality control This text has been designed to be used not only by processors bottlers canners and others involved in the citrus industry but it can be of value to instructors and students of citrus technology Researchers also can find value in the foundations laid down by the text especially in regard to the needs and concerns of the processing industry Also consultants and marketing personnel will be greatly helped by understanding the concepts of this volume Persons in related industries also will find many applications that can be easily adapted to their needs Detroit Medical Journal ,1909 Cellulose Abu Zahrim Yaser, Mohd Sani Sarjadi, Junidah Lamaming, 2023-09-26 Cellulose Development Processing and Applications covers topics related to advanced cellulose development and processing as well as the utilization of major agricultural and biomass waste It discusses the utilization of cellulose from other agricultural and biomass materials including oil palm biomass bamboo and other non wood forest products in emerging areas It covers the treatments used to improve the quality of cellulosic materials in specific applications Following that the book delves into the use of cellulosic materials in the application of composting science and technology Features Delves into the specific agriculture waste biomass waste materials used for the advanced cellulose based production Outlines the potential use of the covered materials for energy production and other emerging applications Includes composting technology and processes using the cellulosic materials Overviews industrial applications of cellulose from agricultural waste biomass waste and composting technology Discusses

the main agricultural waste biomass in the Asian region This book is aimed at researchers and graduate students in chemical engineering bioprocessing composites and biotechnology Modern Chemical Technology and Emission Control M.B. Hocking, 2012-12-06 This text of applied chemistry considers the interface between chemistry and chemical engineering using examples of some of the important process in dustries Integrated with this is detailed consideration of measures which may be taken for avoidance or control of potential emissions This new emphasis in applied chemistry has been developed through eight years of experience gained from working in industry in research development and environment al control fields plus twelve years of teaching here using this approach It is aimed primarily towards science and engineering students as well as to envi ronmentalists and practising professionals with responsibilities or an interest in this interface By providing the appropriate process information back to back with emis sions and control data the potential for process fine tuning is improved for both raw material efficiency and emission control objectives This approach also emphasizes integral process changes rather than add on units for emis sion control Add on units have their place when rapid action on an urgent emission problem is required or when control simply is not feasible by pro cess integral changes alone Obviously fundamental process changes for emission containment are best conceived at the design stage However at whatever stage process modifications are installed this approach to control should appeal to the industrialist in particular in that something more sub stantial than decreased emissions may be gained
