The Construction of Commercial Contracts JW Carter, 2013-01-04 This book adopts a principled approach to the law applied in the construction of commercial contracts This approach is presented as part of a coherent theory of the law of contract construction which makes a unique contribution to scholarship and understanding of the most important aspect of the practice of commercial lawyers The law is explained by reference to three stages in construction It distinguishes the preliminary stage in which context is established from the meaning and application stages of contract construction The approach provides insights both into the practical problems that lawyers face in particular in relation to admissibility of extrinsic evidence and the theoretical underpinnings of the subject The book also explains the relationship between intention and construction and discusses general and specific rules that determine the results of construction disputes Each chapter is introduced by statements of its objectives and the book includes simple definitions of key concepts as well as summaries of the complex principles which comprise the law of construction In illustrating construction principles and their application the exposition of the law draws on the author's knowledge of Australian contract law and the influence and role of the UNIDROIT principles CISG and the American Restatement Second Contracts

Achieve Lasting Process Improvement Bennet Lientz, Kathryn Rea, 2009-11-03 Methods of improving business processes are developed on an ongoing basis but few are successful Common problems encountered include the failure of processes to meet expectations and the inability to sustain or replicate these business processes Involvement of personnel at grassroots level as well as at management level is essential

in implementing effective process improvement methods The authors present a step by step approach to the issue of effective process improvement offering more than 200 tips and guidelines as well as addressing specific common problems and issues The strategy presented is to take a broad and intuitive but learned view of process improvement methods and the tactics expounded are based on guidelines common faults and lessons learned The authors disparage process improvement operations that depend on jargon and the support of just upper management and promote grassroots involvement and self sustaining measurement making this an essential guide for all with involvement in process improvement

Multi-Objective Optimization in Chemical Engineering Gade Pandu Rangaiah, Adrian Bonilla-Petriciolet, 2013-03-20 For reasons both financial and environmental there is a perpetual need to optimize the design and operating conditions of industrial process systems in order to improve their performance energy efficiency profitability safety and reliability However with most chemical engineering application problems having many variables with complex inter relationships meeting these optimization objectives can be challenging This is where Multi Objective Optimization MOO is useful to find the optimal trade offs among two or more conflicting objectives This book provides an overview of the recent developments and applications of MOO for modeling design and operation of chemical petrochemical pharmaceutical energy and related processes It then covers important theoretical and computational developments as well as specific applications such as metabolic reaction networks chromatographic systems CO₂ emissions targeting for petroleum refining units ecodesign of chemical processes ethanol purification and cumene process design Multi Objective Optimization in Chemical Engineering Developments and Applications is an invaluable resource for researchers and graduate students in chemical engineering as well as industrial practitioners and engineers involved in process design modeling and optimization

Enabling Flexibility in Process-Aware Information Systems Manfred Reichert, Barbara Weber, 2012-08-28 In today s dynamic business world the success of a company increasingly depends on its ability to react to changes in its environment in a quick and flexible way Companies have therefore identified process agility as a competitive advantage to address business trends like increasing product and service variability or faster time to market and to ensure business IT alignment Along this trend a new generation of information systems has emerged so called process aware information systems PAIS like workflow management systems case handling tools and service orchestration engines With this book Reichert and Weber address these flexibility needs and provide an overview of PAIS with a strong focus on methods and technologies fostering flexibility for all phases of the process lifecycle i e modeling configuration execution and evolution Their presentation is divided into six parts Part I starts with an introduction of fundamental PAIS concepts and establishes the context of process flexibility in the light of practical scenarios Part II focuses on flexibility support for pre specified processes the currently predominant paradigm in the field of business process management BPM Part III details flexibility support for loosely specified processes which only partially specify the process model at build time while decisions regarding the exact specification of certain model parts are

deferred to the run time Part IV deals with user and data driven processes which aim at a tight integration of processes and data and hence enable an increased flexibility compared to traditional PAIS Part V introduces existing technologies and systems for the realization of a flexible PAIS Finally Part VI summarizes the main ideas of this book and gives an outlook on advanced flexibility issues The book s target groups include researchers PhD students and Master students in the field of information systems After reading the book they will better understand PAIS flexibility aspects To support the easy use as a textbook a series of exercises is provided at the end of each chapter and slides and further teaching material are available on the book s web site www.flexibleprocesses.com Professionals specializing in business process management BPM who want to obtain a good understanding of flexibility challenges in BPM and state of the art solutions will also benefit from the presentations of open source as well as commercial process management systems and related practical scenarios

Supervision Peter Burke, Robert D. Krey, 2005 The first edition of this book titled A DESIGN FOR INSTRUCTIONAL SUPERVISION provided a structural framework for an effective program of instructional supervision The basic cognitive thrust of this second edition SUPERVISION A Guide to Instructional Leadership remains the same as the first What has changed is the attention to the detail surrounding the design components References have been updated and streamlined activities have been modified and examples of structure have been created using the current national policy situation as a base Philosophical and historical definitions of supervision are maintained and expanded in this edition It will help professionals with responsibilities for instructional leadership design a supervisory program that fits a local situation by taking advantage of the foundation provided herein Attention is given to the selection of and the interrelationships between those assumptions principles objectives criteria and procedures so that planners of supervisory programs will gain the knowledge and tools necessary to create that structure from this book It also provides a means for schools to have a well conceived carefully designed properly implemented and continuously evaluated plan for the supervision of instruction in order to reply competently to state and federally mandated assessments for students In addition personal perspectives of the authors are presented in each part of the text The book will serve as a guide and provide direction to instructional supervisors directors of services principals administrators at all levels teachers grade level or department chairs and others interested in the management of instruction in the school setting
