Purposive Explanation In Psychology:

Purposive Explanation in Psychology Margaret A. Boden,1972 **Philosophy and History of Psychology** Elizabeth R Valentine,2020-04-15 In the World Library of Psychologists series international experts themselves present career long collections of what they judge to be their finest pieces extracts from books key articles salient research findings and their major practical theoretical contributions Elizabeth Valentine has an international reputation as an eminent scholar and pioneer in the field of philosophy and history of psychology This selection brings together some of her best work over the last thirty years A specially written introduction gives an overview of her career and contextualises the selection in relation to changes in the field during this time The first section on Philosophy covers work on different theoretical approaches to psychology introspection and the study of consciousness the mind body problem and different types of explanation in psychology including reductionism The second section From Philosophy to History includes work on the philosophical psychologists G F Stout and James Sully among others The third section on History covers Valentine s more recent historical work on the development of psychology in London both institutional and biographical and includes accounts of both Bedford College and University College and the role of pioneer women psychologists The book enables the reader to trace developments in the philosophy and history of psychology over the last thirty years It will appeal to anyone with interests in these areas as well as being an invaluable resource for graduate and advanced undergraduate courses in conceptual and historical issues

Human Motivation Nathan Brody,2013-10-22 Human Motivation Commentary on Goal Directed Action deals with human motivation illustrating a simplistic model of a goal directed action sequence derived from the usual layman s conception of a goal directed action This book consists of five chapters After an introduction provided in Chapter 1 Chapter 2 considers the Hullian tradition in motivation emphasizing that there is a body of evidence that requires an analysis of motivational phenomena in nonpurposive terms The theories growing out of research on achievement motivation is examined in Chapter 3 Chapter 4 covers the theory of affective dynamics and applications of certain economic principles to human behavior including theoretical developments to the theory of action presented in the preceding chapter Chapter five discusses complexities in the commonsense view of action tendencies such as the usual assumption that individuals are aware of the reasons for their actions and goals toward which their actions are directed is challenged This publication is a good reference for students and researchers conducting work on the study of human motivation

Philosophy of Psychology Stuart Brown,2016-01-05 **Philosophical Problems in Psychology** Neil Bolton,2025-04-01 Philosophical psychology reflects upon the aims and the concepts of empirical psychology First published in 1979 Philosophical Problems in Psychology argues that empirical psychology must be founded upon the language of rationality for actions and the reasons people give for their actions are at the heart of human behaviour This thesis is defended in the contributions to Part I which assert that psychology must take the form of an elaboration of common sense But the authors in Part II maintain that

psychology may remain faithful to this insight whilst still developing more sophisticated models of behaviour The use of computer models Piaget's views on the effects of internalization and a discussion of the geometry of phenomenal space provide illustrations Part III contains three papers which explore the limitations of theoretical statements which emphasize our construction of reality The pertinence of the computer analogy is disputed subject centred models are scrutinized in the light of phenomenology and the role of theory in psychotherapy is critically discussed *Explanation and Experiment in Social Psychological Science* John D. Greenwood, 2012-12-06 This book is about explanation and experiment in a science of human action It aims to provide a philosophy of social psychological science that both embodies sound principles of scientific reasoning and is sensitive to the social psychological dimensions of human action The guiding principle of this book is the belief that the logical forms of causal explanation and experimental evaluation can be effectively employed in the scientific analysis of meaningful human action According to most accounts social psychological science has been in a more or less constant state of crisis for the past decades having been subject to a host of criticisms on moral political methodological and philosophical grounds Many of these critiques have been directed against the still dominant conception of social psychological enquiry as a causal and objective scientific discipline that is closely analogous to if not to be identified as a branch of the natural sciences Thus many of the most vigorous debates have concerned the nature of explanation and the utility of experimentation in a social psychological discipline *Empiricism, Explanation and Rationality* Len & Roger Doyal & Harris, 2013-04-15 Originally published in 1986 All students of social science must confront a number of important philosophical issues This introduction to the philosophy of the social sciences provides coherent answers to questions about empiricism explanation and rationality It evaluates contemporary writings on the subject which can be as difficult as they are important to understand Each chapter has an annotated bibliography to enable students to pursue the issues raised and to assess for themselves the arguments of the authors Goal Concepts in Personality and Social Psychology Lawrence A. Pervin, 2015-06-19 Is behavior motivated And if so can it be motivated by the anticipation of future events What role does cognition play in such motivational processes And further what role does motivation play in ongoing cognitive activity Questions such as these provide the foundation for this book originally published in 1989 More specifically the chapters in this book address the question of the utility of goals concepts in studying motivation and social cognition **The Soul in Soulless Psychology** Robert Kugelman, 2023-02-16 Modern psychology began with a rejection of the soul as relevant for the science How did that come about The Soul in Soulless Psychology explores that question and details arguments for a soulless psychology However there was also opposition to this notion This alternative history of psychology examines those who dissented from a psychology without a soul including Neoscholastic psychologists and others such as Ladd M nsterberg and McDougall Substitutions for the soul such as self personality and the brain show that even with the soul absent its concerns were present Innovative re thinkings of the soul are addressed as well as attempts at restoration of the soul into

psychology Moreover historical psychologies of the soul kept the soul in view In the twenty first century we find soul as a noun an adjective and a verb all pointing to the necessity of the soul for psychology *Conceptual Issues in Psychology*
Elizabeth R. Valentine,2013-10-28 This comprehensive and up to date textbook gives a clear account of the different philosophical and theoretical approaches to psychology and discusses major philosophical questions such as free will and the relation between mind and body
