**The Gods' Machines**  
Wun Chok Bong, 2008-05-27 Based on the author's decipherment of prehistoric carvings and the application of mathematical measurements The Gods Machines shows how unknown phenomena from Angkor Wat to Stonehenge to crop circles are actually powerhouses built by an advanced extraterrestrial civilization for tapping electromagnetic energy The book traces the development of that civilization on Earth over 5 000 years revealing how all these structures are aligned according to a universal formula an angle of 135 degrees at which Earth's energy has been tapped by the alien creators of these monuments These fascinating theories not only explain our distant past but also open the door to a future of power technology and space travel Megalithic sites such as Newgrange and Stonehenge are constructed with quartz and iron rich stones with electrical conduction properties minerals also found atop Aztec temple and inside crop circles These stones according to the author served as dry cell batteries when heated and stressed and supplied energy to the builders traveling vehicles Most interestingly the author has tested his theory on today's crop circles The Gods Machines is certain to stimulate debate among readers interested in alternative history ancient civilization and extraterrestrial intelligence

**Prehistoric Europe** Julian Heath, 2025-08-07 A full-color examination of 50 fascinating and important archaeological discoveries from prehistoric Europe. Countless archaeological sites and artefacts relating to the diverse prehistoric peoples who occupied the landscapes of Europe thousands of years ago have been unearthed, either by archaeologists or by lucky individuals who stumbled across them by chance. Prehistoric Europe 50 Great Discoveries examines a small but carefully chosen selection of sites and artefacts from among this abundance of archaeological evidence, all of which are remarkable and provides fascinating insights into Europe's distant past and its long-lost prehistoric societies. These 50 discoveries cover some sixty thousand years of European prehistory, beginning in the Middle Paleolithic (Old Stone Age), the time of our enigmatic ancient cousins, the Neanderthals, and ending in the Iron Age, the time of Celtic society, and marking the last chapter in the remarkable story of prehistoric Europe. Lying between the Middle Paleolithic and the Iron Age, discoveries are those from the Mesolithic (Middle Stone Age), Neolithic (New Stone Age), Chalcolithic (Copper Age), and Bronze Age. Europe's Mesolithic, Neolithic, Chalcolithic, and Bronze Age mark the time of Europe's final hunter-gatherer societies, its first farming communities, and the emergence of metalworking.

one location in relief through comparison to others These revisions rethinking and scalar reflections encourage us to appreciate the complexity and diversity of past contexts as amply illustrated in contributions to this volume In short resuscitating echoes of Anthropocene Africa is painstaking work In this way and others archaeology is and should be slow science Ann B Stahl University of Victoria BC Canada
