Parent Engagement in Early Learning Julie Powers,2016-03-07 This second

edition of Parent Friendly Early Learning brings to life real scenarios that care providers face in today's world. We know parent engagement is important for a child's success but how do you turn parent-provider relationships into partnerships? Learn how to improve parent-teacher communication, deal with family issues and special complications, and how to work with the modern family. Julie Powers has worked with children, families, educators, and communities for over forty years. She started preschool programs at the Dodge Nature Center in St. Paul, Minnesota, an inclusion-based program for Catalina Foothills School District in Tucson, Arizona, and was a consultant for the Air Force Child Development Centers. She has taught at colleges across the country and is currently an associate professor of early childhood education at the University of Hawaii Maui College.

The SAGE Encyclopedia of Contemporary Early Childhood Education Donna Couchenour, J. Kent Chrisman, 2016-03-15. The general public often views early childhood education as either simply babysitting or as preparation for later learning. Of course, both viewpoints are simplistic. Deep understanding of child development, best educational practices based on development, emergent curriculum, cultural competence, and applications of family systems are necessary for high-quality early education. Highly effective early childhood education is rare in that it requires collaboration and transitions among a variety of systems for children from birth through eight years of age. The SAGE Encyclopedia of Contemporary Early Childhood Education presents in three comprehensive volumes advanced research, accurate practical applications of research, historical foundations, and key facts from the field of contemporary early childhood education. Through approximately 425 entries, this work includes all areas of child development: physical, cognitive, language, social, emotional, aesthetic, as well as a comprehensive review of best educational practices with young children, effective preparation for early childhood professionals, and policy-making practices, and addresses such questions as: How is the field of early childhood education defined? What are the roots of this field of study? How is the history of early childhood education similar to yet different from the study of public education? What are the major influences on understandings of best practices in early childhood education?

Children and Childhoods 1 Peter Whiteman, 2011-10-18. The early years of life are fast gaining prominence around the world. It is well documented that investment in early childhood results in exceptionally high returns in multiple arenas greater than those resulting from enterprise focused on later periods in people's lives. This book presents current early years research that reflects the transdisciplinary nature of childhood. The first in the Children and Childhoods series, this volume examines multiple perspectives, places, and practices that constitute early childhood. The many facets of how children and childhoods are seen, where they are enacted, and how they are played out are explained through explorations of playgrounds, hospitals, museums, child-care centres, and other locations. Similarly diverse are the methodologies that underpin these investigations. Children, practitioners, families, and researchers all contribute to this cornucopia of children and childhoods.

Interrupting the Psy-Disciplines in Education Eva Bendix Petersen, Zsuzsa Millei, 2016-08-09. This book offers critical explorations of how the psy-disciplines, Michel Foucault's collective term for

psychiatry psychology and psycho analysis play out in contemporary educational spaces With a strong focus on Foucault's theories it critically investigates how the psy disciplines continue to influence education both regulating and shaping behaviour and morality The book provides insight into different educational contexts and concerns across a child's educational lifespan early childhood education inclusive education special education educational leadership social media university and beyond to enable reflection and critique of the implications of psy based knowledge and practice With chapters by a mixture of established and emerging international scholars in the field this is an interdisciplinary and authoritative study into the role of the psy disciplines in the education system Providing vivid illustrations from throughout the educational lifespan the book serves as an invaluable tool for reflection and critique of the implications of psy based practice and will be of particular interest to academics and scholars in the field of education policy and psychology
