**Security and Protection in Information Processing Systems** Yves Deswarte, Frederic Cuppens, Sushil Jajodia, Lingyu Wang, 2006-04-11  
Security is probably the most critical factor for the development of the Information Society. E-government, e-commerce, e-healthcare, and all other e-activities present challenging security requirements that cannot be satisfied with current technology, except maybe if the citizens accept to waive their privacy, which is unacceptable ethically and socially. New progress is needed in security and privacy-preserving technologies. On these foundations, the IFIP SEC conference has been established from the eighties as one of the most important forums for presenting new scientific research results as well as best professional practice to improve the security of information systems. This balance between future technology improvements and day-to-day security management has contributed to better understanding between researchers, solution providers, and practitioners, making this forum lively and fruitful. Security and Protection in Information Processing Systems contains the papers selected for presentation at the 19th IFIP International Conference on Information Security SEC2004, which was held in August 2004 as a co-located conference of the 18th IFIP World Computer Congress in Toulouse.
