Information Security Management, Education and Privacy Yves Deswarte, Frederic Cuppens, Sushil Jajodia, Lingyu Wang, 2006-04-11 This volume gathers the papers presented at three workshops that are embedded in the IFIP Security Conference in 2004 to enlighten specific topics that are currently particularly active in Security The first one is the 10th IFIP Annual Working Conference on Information Security Management It is organized by the IFIP WG 11.1 which is itself dedicated to Information Security Management i.e. not only to the practical implementation of new security technology issued from recent research and development but also and mostly to the improvement of security practice in all organizations from multinational corporations to small enterprises Methods and techniques are developed to increase personal awareness and education in security analyze and manage risks identify security policies evaluate and certify products processes and systems Matt Warren from Deakin University Australia who is the current Chair of WG 11.1 acted as the Program Chair The second workshop is organized by the IFIP WG 11.8 dedicated to Information Security Education This workshop is a follow up of three issues of the World Conference on Information Security Education WISE that were also organized by WG 11.8 The first WISE was organized by Louise Yngstrom in 1999 in Stockholm and the next one WISE 4 will be held in Moscow Russia 18-20 May 2005 This year the workshop is aimed at developing a first draft of an international doctorate program allowing a specialization in IT Security

Privacy-Respecting Intrusion Detection Ulrich Flegel, 2007-08-28 Computer and network security is an issue that has been studied for many years The Ware Report which was published in 1970 pointed out the need for computer security and highlighted the difficulties in evaluating a system to determine if it provided the necessary security for particular applications The Anderson Report published in 1972 was the outcome of an Air Force Planning Study whose intent was to define the research and development paths required to make secure computers a reality in the USAF A major contribution of this report was the definition of the reference monitor concept which led to security kernel architectures In the mid to late 1970s a number of systems were designed and implemented using a security kernel architecture These systems were mostly sponsored by the defense establishment and were not in wide use Fast forwarding to more recent times the advent of the world wide web inexpensive workstations for the office and home and high speed connections has made it possible for most people to be connected This access has greatly benefited society allowing users to do their banking shopping and research on the Internet Most every business government agency and public institution has a public facing web page that can be accessed by anyone anywhere on the Internet fortunately society's increased dependency on networked software systems has also given easy access to the attackers and the number of attacks is steadily increasing
