## **Security Identity And Interests A Sociology Of International Relations:**

**Security, Identity and Interests** Bill McSweeney, 1999-11-04 Bill McSweeney addresses the central problem of international relations security and constructs a novel framework for its analysis. He argues for the unity of the interpersonal, societal and international levels of human behaviour and outlines a concept of security which more adequately reflects the complexity and ambiguity of the topic. This book introduces an alternative way of theorizing the international order within which the idea of security takes on a broader range of meaning, inviting a more critical and interpretative approach to understanding the concept and formulating security policy. The recent shift to sociology in international relations theory has not as yet realized its critical potential for the study of security. Drawing on contemporary trends in social theory, Dr McSweeney argues that human agency and moral choice are inherent features of the construction of the social and thus international order and hence of our conception of security and security policy. **Natural Gas at the Frontline Between the EU, Russia, and Turkey** Roxana Andrei, 2022-11-16 This book analyses the rapidly unfolding events that have impacted on the European energy dynamics in the light of the way in Ukraine and the energy crisis that have reconfigured since 2022 the European and the global geopolitical scene, dislocating not only crucial natural resources but also the pace of the energy transition and the continent's existential security, its basic trust and sense of continuity. It introduces an innovative interpretation of the conflict and cooperation dynamics in Europe by challenging the reader to look beyond the material aspects of energy security related to supply and demand, consumption, production and prices dynamics which I nonetheless explain in detail. Thus it invites the audience to explore the deeper layer of motivations that underpin the actors' decision to engage in conflict and cooperation by exploring their cognitive and psychological considerations in addition to the material ones. For this purpose it presents a new conceptual tool, the conflict-cooperation perpetuum, in order to explain why the same players in this case the EU, Russia and Turkey may choose to simultaneously perceive each other as security threats and trade partners, engaging in both conflict and cooperation simultaneously with the same Other. In addition, it proposes to apply the framework of ontological security in order to understand the responses of the EU, Russia and Turkey to the major existential crises that have affected them in past years, culminating with the war in Ukraine and the energy crisis of 2022. *Europeanization of National Security Identity*

Pernille Rieker, 2006-05-09 This new book tackles two key questions: 1. How is the EU functioning as a security actor? 2. How and to what extent is the EU affecting national security identities? Focusing on the four largest Nordic states, Denmark, Finland, Norway and Sweden, this incisive study analyzes how and to what extent the EU affects national security identities. It shows how the EU has developed into a special kind of security actor that, due to its level of political integration, has an important influence on national security approaches and identities. This new analysis applies a fresh combination of integration theory, security studies and studies of Europeanization. The main argument in this book is that rather than

adapting to the changing conditions created by the end of the Cold War the Nordic states changed their security approaches in response to the European integration process It shows how different phases in the post Cold War European integration process have influenced the national security approaches of Sweden Finland Denmark and Norway While all four security approaches seem to have been Europeanized the speed and the character of these changes seem to vary due to a combination of differing ties to the EU and differing security policy traditions This new book will be of great interest to all students of European Defence national security and of security studies in general

*Post-Cold War Identity Politics* Marko Lehti, David J. Smith, 2004-11-23. During the past decade, northern Europe has started to assume an identity of its own. Categories of East and West have become blurred, challenging as well the idea of what it means to be Nordic. *Post-Cold War Identity Politics* maps this process in Scandinavia. Looking at projects designed to help regional development in the Nordic countries, it assesses whether a new way of defining Northernness is emerging. The book highlights the existence of co-existing and to some extent competing region-building projects in northern Europe. It demonstrates how they are all efforts by existing nations to redefine their role in Europe at a time of change and points to how they might develop in the future.

*Worldviews of Aspiring Powers* Henry R. Nau, Deepa M. Ollapally, 2012-10-03. *Worldviews of Aspiring Powers* provides a serious study of the domestic foreign policy debates in five world powers who have gained more influence as the US's has waned: China, Japan, India, Russia, and Iran. Featuring a leading regional scholar for each essay, each essay identifies the most important domestic schools of thought: nationalists, realists, globalists, idealists, exceptionalists, and connects them to the historical and institutional sources that fuel each nation's foreign policy experience. While scholars have applied this approach to US foreign policy, this book is the first to track the competing schools of foreign policy thought within five of the world's most important rising powers. Concise and systematic, *Worldviews of Aspiring Powers* will serve as both an essential resource for foreign policy scholars trying to understand international power transitions and as a text for courses that focus on the same.

**Constructing National Security** Jarrod Hayes, 2013-10-07. Jarrod Hayes explores why democracies tend not to use military force against each other. He argues that democratic identity—the shared understanding within democracies of who we are and what we expect from each other—makes it difficult for political leaders to construct external democracies as threats. At the same time, he finds that democratic identity enables political actors to construct external non-democracies as threats. To explore his argument, he looks at US relations with two rising powers: India and China. Through his argument and case studies, Professor Hayes

addresses not just the democratic peace but also the larger processes of threat construction in international security the role of domestic institutions in international relations and the possibility for conflict between the United States and the world's two most populous countries      *Crisis and Ontological Insecurity* Filip Ejdus, 2019-07-01 This book develops a novel way of thinking about crises in world politics By building on ontological security theory this work conceptualises critical situations as radical disjunctions that challenge the ability of collective agents to go on These ontological crises bring into the realm of discursive consciousness four fundamental questions related to existence finitude relations and autobiography In times of crisis collective agents such as states are particularly attached to their ontic spaces or spatial extensions of the self that cause collective identities to appear more firm and continuous These theoretical arguments are illustrated in a case study looking at Serbia's anxiety over the secession of Kosovo The author argues that Serbia's seemingly irrational and self-harming policy vis vis Kosovo can be understood as a form of ontological self help It is a rational pursuit of biographical continuity and a healthy sense of self in the face of an ontological crisis triggered by the secession of a province that has been constructed as the ontic space of the Serbian nation since the late 19th century      **Deconstructing Japan's Image of South Korea** T. Tamaki, 2010-03-29 What role does identity play in foreign policy How might identity impact on Japan's relations with South Korea This book takes identity theorizing in International Relations theory a step further by attempting to account for a resilient collective identity that informs policy makers throughout time and space      Routledge Handbook of Gender and Security Caron E. Gentry, Laura J. Shepherd, Laura Sjoberg, 2018-09-03 This handbook provides a comprehensive look at the study of gender and security in global politics The volume is based on the core argument that gender is conceptually necessary to thinking about central questions of security analytically important for thinking about cause and effect in security and politically important for considering possibilities of making the world better in the future Contributions to the volume look at various aspects of studying gender and security through diverse lenses that engage diverse feminisms with diverse policy concerns and working with diverse theoretical contributions from scholars of security more broadly It is grouped into four thematic sections Gendered approaches to security including theoretical conceptual and methodological approaches Gendered insecurities in global politics including the ways insecurity in global politics is distributed and read on the basis of gender Gendered practices of security including how policy practice and theory work together or do not Gendered security institutions across a wide variety of spaces and places in global politics This handbook will be of great interest to students of gender studies security studies and IR in general      *Inclusion, Exclusion and the Governance of European Security* Mark Webber, 2013-07-19 How inclusive are NATO and the EU Recently enlargement's limits have increasingly come to be recognised bringing with it an important debate on the balance to be struck between inclusion and exclusion This book examines that sometimes awkward balance      *European Security in the Twenty-First Century* Adrian Hyde-Price, 2007-02-12 Combining a sophisticated theoretical analysis with detailed empirical case studies this book provides

an original view of the challenges and threats to a stable peace order in Europe The end of Cold War bipolarity has transformed Europe Using structural realist theory Adrian Hyde Price analyzes the new security agenda confronting Europe in the twenty first century Europe he argues is not primed for peace as mainstream thinking suggests rather it faces new security threats and the challenge of multipolarity This critical and original volume looks at European security after the Iraq War the failure of the EU constitution and the change of government in Germany Reflecting on the inherently competitive and tragic nature of international politics it concludes that realism provides the only firm foundations for an ethical foreign and security policy European Security in the Twenty First Century will appeal to students and scholars of international relations European politics and security studies Conflict Resolution and Ontological Security Bahar Rumelili, 2014-12-17 This volume highlights the ways in which the prospect of peace can generate anxieties and consequently set in motion social and political processes that reproduce and reactivate conflicts In analysing this issue the volume builds on the notion of ontological security and its recent applications to international relations theory Although conflicts threaten the physical security of the parties involved they also help settle existential questions about basic parameters of life being and identity and thus over time become sources of ontological security The prospect of peace through the resolution or transformation of conflict threatens to unsettle the stability and consistency of self narratives and their associated routines and habits at the individual group and state levels The contributors argue two key points 1 that ontological insecurity may set in motion political and social processes that reproduce and reactivate conflicts 2 that coping with peace anxieties necessitates the formulation of alternative self narratives at the individual societal and state levels that re situate the Self in relation to Other and to the world at large Consequently the book analyses the ways in which and the conditions under which conflict resolution induces ontological insecurity and the different ways in which ontological insecurity has prevented the successful culmination of peace processes in different conflict contexts including Cyprus Israel Palestine and Northern Ireland This book will be of much interest to students of critical security studies conflict resolution peace and conflict studies social theory and IR in general
