Seductive Illusion:

Seductive Illusion Joanne Bremer, 1984 Real Deceptions Jennifer Friedlander, 2017 *Real Deceptions* develops a new theory of realism through close consideration of myriad contemporary art media and cultural practices. Rather than focusing on transgressing deceptions which distort reality, the book argues that reality lies within the deceptions themselves. That is to say, realism's political potential emerges not by revealing deception but precisely by staging deceptions, particularly deceptions that imperil the very categories of true and false. In lieu of perceiving deception as an obstacle to truth, it shows how deception functions as the truth's necessary conduit. Categories invoked in realist works such as trompe l'oeil, illusion, hypervirtuality, and simulation help to establish how realism can be seen as moving from the creation of mere epistemological uncertainty to radical ontologically based indeterminacy. The book cultivates this schema by considering productive connections between insights from Jacques Lacan and Jacques Rancière. *Real Deceptions* not only applies these theoretical frameworks to art and media examples but also engages in the reverse move of using the cases to further the theories. This dual approach points to the ways in which efforts to produce realist representations often give rise to the destabilizing *Real*.

Narrating the Visual in Shakespeare Richard Meek, 2017-03-02 This book examines Shakespeare s fascination with the art of narrative and the viscosity of language Richard Meek complicates our conception of Shakespeare as either a man of the theatre or a literary dramatist suggesting ways in which his works themselves debate the question of text versus performance Beginning with an exploration of the pictorialism of Shakespeare s narrative poems the book goes on to examine several moments in Shakespeare s dramatic works when characters break off the action to describe an absent offstage event place or work of art Meek argues that Shakespeare does not simply prioritise drama over other forms of representation but rather that he repeatedly exploits the interplay between different types of mimesis narrative dramatic and pictorial in order to beguile his audiences and readers Setting Shakespeare s works in their literary and rhetorical contexts and engaging with contemporary literary theory the book offers new readings of *Venus and Adonis* *The Rape of Lucrece* *Hamlet* *King Lear* and *The Winter s Tale* The book will be of particular relevance to readers interested in the relationship between verbal and visual art theories of representation and mimesis Renaissance literary and rhetorical culture and debates regarding Shakespeare s status as a literary dramatist **Capitalism as If the World Matters** Jonathon Porritt, 2007 First

Analogy is the core of all thinking This is the simple but unorthodox premise that Pulitzer Prize winning author Douglas Hofstadter and French psychologist Emmanuel Sander defend in their new work Hofstadter has been grappling with the mysteries of human thought for over thirty years Now with his trademark wit and special talent for making complex ideas vivid he has partnered with Sander to put forth a highly novel perspective on cognition We are constantly faced with a swirling and intermingling multitude of ill defined situations Our brain s job is to try to make sense of this unpredictable swarming chaos of stimuli How does it do so The ceaseless hail of input triggers analogies galore helping us to pinpoint the essence of what is going on Often this means the spontaneous evocation of words sometimes idioms sometimes the triggering of nameless long buried memories Why did two year old Camille proudly exclaim I undressed the banana Why do people who hear a story often blurt out Exactly the same thing happened to me when it was a completely different event How do we recognize an aggressive driver from a split second glance in our rearview mirror What in a friend s remark triggers the offhand reply That s just sour grapes What did Albert Einstein see that made him suspect that light consists of particles when a century of research had driven the final nail in the coffin of that long dead idea The answer to all these questions of course is analogy making the meat and potatoes the heart and soul the fuel and fire the gist and the crux the lifeblood and the wellsprings of thought Analogy making far from happening at rare intervals occurs at all moments defining thinking from top to toe from the tiniest and most fleeting thoughts to the most creative scientific insights Like G Escher Bach before it Surfaces and Essences will profoundly enrich our understanding of our own minds By plunging the reader into an extraordinary variety of colorful situations involving language thought and memory by revealing bit by bit the constantly churning cognitive mechanisms normally completely hidden from view and by discovering in them one central invariant core the incessant unconscious quest for strong analogical links to past experiences this book puts forth a radical and deeply surprising new vision of the act of thinking Caribbean Genesis Jana Evans Braziel,2009-01-05
