*The California Vegetables in Garden and Field* Edward James Wickson, 1913. The purpose of the work is to give the newcomer or old resident beginner an understanding of the peculiar conditions which he encounters in California and descriptions of gardening practices which attain most satisfactory results under those conditions. Experienced gardeners from other states and countries soon find that their accustomed procedure fails of its wonted results; that the old times and ways of doing things are unsuitable and that new rules of practice must be learned. Often those who have had no earlier gardening experience seek a rural home in California and burn with a desire to possess the delights of a home garden. They soon find that following the advice to beginners given in books written for other climates yields little but disappointment. Conditions of soil and climate in

California are varied to the last degree and practice must vary with them      **House & Garden** ,1913      *Functional Seed Ecology: From Single Traits to Plant Distribution Patterns, Community Assembly and Ecosystem Processes* Sergey Rosbakh, Shyam S.
