Wrobel, Patrick T. Long, 2001 You can see them cruising for Indian art in Santa Fe waiting for Old Faithful at Yellowstone or pausing for shrimp cocktails on San Francisco's Fisherman's Wharf The American West attracts vacationers of every stripe who comb its varied landscapes for the ultimate trip And for better or worse those who come to see this multifaceted region have changed what they have come to see Seeing and Being Seen explores the history of tourism in the American West and examines its effects on both the tourists and the places and people they visit Scholars from the humanities social sciences and business Patricia Nelson Limerick Hal Rothman and others join government and National Park Service professionals to investigate the dilemmas that tourism poses for western communities from economic and environmental questions to cultural change The selections are organized around three broad topics scholarly perceptions of tourism tourists and those toured upon tourism in its historical context including an assessment of its cultural impact on communities and on tourists themselves and the history and impact of tourism on the West's national parks with particular emphasis on efforts to maintain the delicate balance between natural preservation and public enjoyment These essays cover the span of tourism history from early twentieth century See America First campaigns to the problematic place of automobiles in national parks today They also pay special attention to policy choices that the growth of tourism sometimes forces on communities as towns try to bounce back from failed economies by capitalizing on an Old West image or even in the case of Kellogg Idaho Old Bavarian In response the authors offer suggestions by which communities can begin to make rational choices about the role and place of tourism in their lives Seeing and Being Seen is enlightening and necessary reading for scholars policy makers residents of the West and even tourists themselves How to Read the American West William Wyckoff, 2014-05-01 From deserts to ghost towns from national forests to California bungalows many of the features of the western American landscape are well known to residents and travelers alike But in How to Read the American West William Wyckoff introduces readers anew to these familiar landscapes A geographer and an accomplished photographer Wyckoff offers a fresh perspective on the natural and human history of the American West and encourages readers to discover that history has shaped the places where people live work and visit This innovative field guide includes stories photographs maps and diagrams on a hundred landscape features across the American West Features are grouped according to type such as natural landscapes farms and ranches places of special cultural identity and cities and suburbs Unlike the geographic organization of a traditional guidebook Wyckoff's field guide draws attention to the connections and the differences between and among places Emphasizing features that recur from one part of the region to another the guide takes readers on an exploration of the eleven western states with trips into their natural and cultural character How to Read the American West is an ideal traveling companion on the main roads and

byways in the West providing unexpected insights into the landscapes you see out your car window It is also a wonderful source for armchair travelers and people who live in the West who want to learn more about the modern West how it came to be and how it may change in the years to come Showcasing the everyday alongside the exceptional Wyckoff demonstrates how asking new questions about the landscapes of the West can let us see our surroundings more clearly helping us make informed and thoughtful decisions about their stewardship in the twenty first century Watch the trailer <http://www.youtube.com/watch?v=aYSmp5gZ4I>

Branding the American West Marian Wardle, Sarah E. Boehme, 2016-02-17 Artists and filmmakers in the early twentieth century reshaped our vision of the American West In particular the Taos Society of Artists and the California based artist Maynard Dixon departed from the legendary depiction of the Wild West and fostered new images or brands for western art This volume illustrated with more than 150 images examines select paintings and films to demonstrate how these artists both enhanced and contradicted earlier representations of the West Prior to this period American art tended to portray the West as a wild frontier with untamed lands and peoples Renowned artists such as Henry Farny and Frederic Remington set their work in the past invoking an environment immersed in conflict and violence This trademark perspective began to change however when artists enamored with the Southwest stamped a new imprint on their paintings The contributors to this volume illuminate the complex ways in which early twentieth century artists as well as filmmakers evoked a southwestern environment not just suspended in time but also permanent rather than transient Yet as the authors also reveal these artists were not entirely immune to the siren call of the vanishing West and their portrayal of peaceful yet exotic Native Americans was an expansion rather than a dismissal of earlier tropes Both brands cast a romantic spell on the West and both have been seared into public consciousness *Branding the American West* is published in association with the Brigham Young University Museum of Art Provo Utah and the Stark Museum of Art Orange Texas

Selling British Columbia Michael Dawson, 2007-10-01 *Selling British Columbia* is an entertaining examination of the development of the tourist industry in British Columbia between 1890 and 1970 Michael Dawson argues that in order to understand the roots of the fully fledged consumer culture that emerged in Canada after the Second World War it is necessary to understand the connections between the 1930s 1940s and the postwar era Cultural producers such as tourism promoters and the state infrastructure played important roles in fostering consumer demand particularly during the Depression the Second World War and throughout the postwar era Dawson draws upon promotional pamphlets newspapers advertisements and films as well as archival sources regarding government civic and international tourism organizations Central to his book is an examination of the representation of popular imagery and of how aboriginal and British cultures were commodified and marketed to potential tourists He also looks at the gendered aspect of these promotional campaigns particularly during the 1940s and challenges earlier interpretations regarding the relationship between tourism and nature in Canada Historians have tended to focus on either the first wave of consumerism from the 1880s to the 1920s or else on the

era of economic expansion that followed World War Two As Dawson shows the 1930-45 period in particular was an important and dynamic one in the creation of Canadian and British Columbian consumer culture Michael Dawson's highly readable and engaging account of the development of the British Columbia tourist industry will be welcomed by British Columbian and Canadian historians as well as other scholars of tourism and consumerism *The American West and the World* Janne Lahti, 2018-09-21 *The American West and the World* provides a synthetic introduction to the transnational history of the American West Drawing from the insights of recent scholarship Janne Lahti recenters the history of the U.S. West in the global contexts of empires and settler colonialism discussing exploration expansion migration violence intimacies and ideas Lahti examines established subfields of Western scholarship such as borderlands studies and transnational histories of empire as well as relatively unexplored connections between the West and geographically nonadjacent spaces Lucid and incisive *The American West and the World* firmly situates the historical West in its proper global context

Buyways Catherine Gudis, 2004-05-15 The highway has become the buyway Along the millions of miles the public travels advertisers spend billions on images of cola cars vodka fast food and swimming pools that blur past us catching our fleeting attention and turning the landscape into a corridor of commerce A smart succinct and visually compelling history of the billboard in America *Buyways* traces how the outdoor advertising industry changed the face of American commercialism Taking us from itinerant bill stickers of circus posters in the 19th century to the blinking beeping 3D eyesores of today Gudis argues that roadside advertising has turned the landscape itself into a commodity to be bought and sold as advertising space *Buyways* vividly chronicles the battles between environmentalists and businessmen as well as the response of artists from New Deal photographers who satirized the billboard infested landscape to commercial artists who embraced the kitsch of it all It also shows how advertisers tapped into the American mythology of the open road promoting mobile consumption as the American Dream on four wheels Entertaining and brilliantly illustrated *Buyways* is a vibrant road map of the new geography of consumption Also includes an eight page color insert

Education in the School of Dreams Jennifer Lynn Peterson, 2013-05-22 In the earliest years of cinema travelogues were a staple of variety film programs in commercial motion picture theaters These short films also known as scenics depicted tourist destinations and exotic landscapes otherwise inaccessible to most viewers Scenics were so popular that they were briefly touted as the future of film But despite their pervasiveness during the early twentieth century travelogues have been overlooked by film historians and critics In Education in the School of Dreams Jennifer Lynn Peterson recovers this lost archive Through innovative readings of travelogues and other nonfiction films exhibited in the United States between 1907 and 1915 she offers fresh insights into the aesthetic and commercial history of early cinema and provides a new perspective on the intersection of American culture imperialism and modernity in the nickelodeon era Peterson describes the travelogue's characteristic form and style and demonstrates how imperialist ideologies were realized and reshaped through the moving image She argues that although educational films were intended to legitimate filmgoing for middle class audiences travelogues were not simply vehicles for elite ideology As a form of instructive entertainment these technological moving

an integrated ecological entity and a key biodiversity stronghold Once the background is set each chapter opens with a specific natural resource controversy ranging from the Pacific Northwest's spotted owl imbroglio to the struggle over southern Utah's Colorado Plateau country Robert Keiter uses these case histories to analyze the ideas forces and institutions that are both fomenting and retarding change Although Congress has the final say in how the public domain is managed the public land agencies federal courts and western communities are each playing important roles in the transformation to an ecological management regime At the same time a newly emergent and homegrown collaborative process movement has given the public land constituencies a greater role in administering these lands Arguing that we must integrate the new imperatives of ecosystem science with our devolutionary political tendencies Keiter outlines a coherent new approach to natural resources policy
