Reading Godot Lois Gordon, 2008-10-01

Waiting for Godot has been acclaimed as the greatest play of the twentieth century It is also the most elusive two lifelong friends sing dance laugh weep and question their fate on a road that descends from and goes nowhere Throughout they repeat their intention Let's go but this is inevitably followed by the direction They do not move This is Beckett's poetic construct of the human condition Lois Gordon author of *The World of Samuel Beckett* has written a fascinating and illuminating introduction to Beckett's great work for general readers students and specialists Critically sophisticated and historically informed it approaches the play scene by scene exploring the text linguistically philosophically critically and

biographically Gordon argues that the play portrays more than the rational mind's search for self and worldly definition. It also dramatizes Beckett's insights into human nature into the emotional life that frequently invades rationality and liberates, victimizes or paralyzes the individual. Gordon shows that Beckett portrays humanity in conflict with mysterious forces both within and outside the self that he is an artist of the psychic distress born of relativism. *DIV DIV Philosophy, Dreaming and the Literary Imagination* Michaela Schrage-Früh, 2016-10-18. This book explores the intersections between dreaming and the literary imagination in light of the findings of recent neurocognitive and empirical research with the aim to lay a groundwork for an empirically informed aesthetics of dreaming. Drawing on perspectives from literary theory, philosophy of mind and dream research, this study investigates dreaming in relation to creativity and waking states of imagination such as writing and reading stories. Exploring the similarities and differences between the language of dreams and the language of literature, it analyses the strategies employed by writers to create a sense of dream in literary fiction as well as the genres most conducive to this endeavour. The book closes with three case studies focusing on texts by Kazuo Ishiguro, Clare Boylan and John Banville to illustrate the diverse ways in which writers achieve to translate the experience and language of the dream.

**Western Rationality and the Angel of Dreams** Murray Lionel Wax, 1999. Throughout recorded time people have been fascinated by dreams and their meanings. Tribal societies valorize knowledge obtained from dreams and respect possession as a channel for revelation. In contrast, implicit in Western intellectual thought is an image of the human as a non-social atom with a unitary and rational mind which turns dreaming into an epiphenomenon or, for Freud, a neurosis in miniature. Integrating materials from anthropology, post-Freudian psychoanalysis, social evolution and the social psychology of Mead, Cooley, James and Sullivan, this book offers a view of the self and the psyche that provides meaning to the views of traditional peoples on dreams, possession and the loss of self.

*Text World Theory and Keats' Poetry* Marcello Giovanelli, 2013-10-17. Uses and further develops text world theory via stylistic exploration of Keats's poetry.

**Nocturnal Seeing** Elliot R. Wolfson, 2024-10-29. In this erudite new work, Elliot R. Wolfson explores philosophical gnosis in the writings of Susan Taubes, Gillian Rose and Edith Wyschogrod. The juxtaposition of these three extraordinary, albeit relatively neglected, philosophers provides a prism through which Wolfson scrutinizes the interplay of ethics, politics and theology. The bond that ties together the diverse and multifaceted worldviews promulgated by Taubes, Rose and Wyschogrod is the mutual recognition of the need to enunciate a response to the calamities of the twentieth century based on an incontrovertible acknowledgment of the decadence and malevolence of human beings without, however, succumbing to acrimony and despair. The speculation of each of these philosophers on melancholia and the tragicomedy of being is unquestionably intricate, exhibiting subtle variations and idiosyncrasies, but we can nevertheless identify a common denominator in their attempt to find the midpoint positioned between hope and hopelessness. As Wolfson articulates, Taubes, Rose and Wyschogrod exemplify a philosophical sensibility informed by a nocturnal seeing which is not merely a seeing in the night but rather a seeing of the

night Ultimately the book reveals the potential for these thinkers ideas to enhance our moral sensitivity and to encourage participation in the ongoing struggle for meaning and decency in the present

**The Nightly Act of Dreaming** Ryan Curtis Friesen,2019-05-28 The search for a shared practice of storytelling around which a popular study of cognitive narratology might form need look no further than our nightly experience of dreams Dreams and memories are inseparable complicating and building upon one another reminding us that knowledge of ourselves based on our memories relies upon fictionalized narratives we create for ourselves Psychologists refer to confabulation the creation of false or distorted memories about oneself and the world we inhabit albeit without any conscious intention to deceive This process and narrative inherent in the dreamlife of all people is at odds with the daily menu of cultural myths and politicized fictions fed to the Western world through print and social media and for which there is constant divisiveness and disagreement Cognitive Narratology and the Shared Identity of Myth uses insights gained from the scientific study of dreaming to explain how the shared experience of dreamlife can work in service to the common good Primary texts and literary works chosen for their influence on contemporary thinking provide a rationale and historical background From Artemidorus a professional diviner and Aristotle to the Church fathers Tertullian St Augustine Gregory of Nyssa Sinesius of Cyrene to The Wanderer Old English poem and Chaucers Book of the Duchess to Coleridges writings and R L Stevensons A Chapter on Dreams and to twentieth century dream theory and dream use in film The purpose is to enable readers through subjective self analysis to recognize what they share with their fellow dreamers shared identity in formation of a shared act of dreaming creation is a universal across centuries and throughout Western culture albeit currently misrepresented and rarely acted upon

*Dream Science* J. F. Pagel,2014-02-05 Dreaming is the cognitive state uniquely experienced by humans and integral to our creativity the survival characteristic that allows for the rapid change and innovation that defines our species and provides the basis for our art philosophy science and humanity Yet there is little empiric or scientific evidence supporting the generally accepted dream based theories of neuroconsciousness Dream Science examines the cognitive science of dreaming and offers an evidence based view of the phenomenon Today such evidence based breakthroughs in the field of dream science are altering our understanding of consciousness Different forms of dreaming consciousness occur throughout sleep and dreamlike states extend into wake Each dream state is developed on a framework of memories emotions representational images and electrophysiology amenable to studies utilizing emerging and evolving technology Dream Science discusses basic insights into the scientific study of dreaming including the limits to traditional Freudian based dream theory and the more modern evidence based science It also includes coverage of the processes of memory and parasomnias the sleep disturbance diagnoses related to dreaming This comprehensive book is a scientific exploration of the mind brain interface and a look into the future of dream science Provides a more evidence based approach than any other work on the market Single source of integrated information on all aspects of dream science makes this a critical time saving reference for researchers and
