On the Move Tim Cresswell, 2006 *On the Move* presents a rich history of one of the key concepts of modern life mobility Increasing mobility has been a constant throughout the modern era evident in mass car ownership plane travel and the rise of the Internet Typically people have equated increasing mobility with increasing freedom However as Cresswell shows while mobility has certainly increased in modern times attempts to control and restrict mobility are just as characteristic of modernity Through a series of fascinating historical episodes Cresswell shows how mobility and its regulation have been central to the experience of modernity

In the Shadow of War and Empire Gökem Akgöz, 2023-12-14 *In the Shadow of War and Empire* offers a site specific history of Ottoman and Turkish industrialisation through the lens of a mid nineteenth century cotton factory in the Turkish Manchester the name chosen by the Ottomans for the industrial complex they built in the 1840s in Istanbul which in the contemporary words of one of the country's most prominent contemporary Marxist theorists became the secret to and the basis of Turkish capitalism in the 1930s

Seeing Like an Activist Erin R. Pineda, 2021-03-12 There are few movements more firmly associated with civil disobedience than the Civil Rights Movement In the mainstream imagination civil rights activists eschewed coercion appealed to the majority's principles and submitted willingly to legal punishment in order to demand necessary legislative reforms and facilitate the realization of core constitutional and democratic principles Their fidelity to the spirit of the law commitment to civility and allegiance to American democracy set the normative standard for liberal philosophies of civil disobedience This narrative offers the civil disobedience of the Civil Rights Movement as a moral exemplar a blueprint for activists who seek transformative change and

racial justice within the bounds of democracy Yet in this book Erin R Pineda shows how it more often functions as a disciplining example a means of scolding activists and quieting dissent As Pineda argues the familiar account of Civil Rights disobedience not only misremembers history it also distorts our political judgments about how civil disobedience might fit into democratic politics *Seeing Like an Activist* charts the emergence of this influential account of civil disobedience in the Civil Rights Movement and demonstrates its reliance on a narrative about black protest that is itself entangled with white supremacy Liberal political theorists whose work informed decades of scholarship saw civil disobedience like a white state taking for granted the legitimacy of the constitutional order assuming as primary the ends of constitutional integrity and stability centering the white citizen as the normative ideal and figuring the problem of racial injustice as limited exceptional and all but already solved Instead this book sees civil disobedience from the perspective of an activist showing the consequences for ideas about how civil disobedience ought to unfold in the present Building on historical and archival evidence Pineda shows how civil rights activists in concert with anticolonial movements across the globe turned to civil disobedience as a practice of decolonization in order to emancipate themselves and others and in the process transform the racial order Pineda recovers this powerful alternative account by adopting a different theoretical approach one which sees activists as themselves engaged in the creative work of political theorizing

The Socialist Life of Modern Architecture
Juliana Maxim, 2018-12-07 *The Socialist Life of Modern Architecture* is the first systematic architectural history of Romania under socialism written in English It examines the mechanisms through which modern architecture was invested with political meaning and in reverse how specific architectural solutions came to define the socialist experience Each of the book's three parts traces the historical development of one key aspect of Romania's architectural culture between the years 1949-1964 the planning and construction of housing districts in Bucharest the role of typification of design and standardization of construction in a project of cultural transformation the production and management of a folk architectural tradition Going beyond buildings and architects to consider the use of photography painting and novels as well as narrations of history and the formation of an ethnographic architectural heritage the author explores how buildings came to participate in the cultural imagination of socialism and became in fact a privileged medium of socialism Part of the growing interest in the significance of Soviet Bloc architecture this is an important contribution to the fields of architectural history cultural history and visual culture

Seeing Like a Citizen Kara Moskowitz, 2019-11-12 In *Seeing Like a Citizen* Kara Moskowitz approaches Kenya's late colonial and early postcolonial eras as a single period of political economic and social transition In focusing on rural Kenyans the vast majority of the populace and the main targets of development interventions as they actively sought access to aid she offers new insights into the texture of political life in decolonizing Kenya and the early postcolonial world Using multisited archival sources and oral histories focused on the western Rift Valley *Seeing Like a Citizen* makes three fundamental contributions to our understanding of African and Kenyan history First it challenges the widely accepted idea of

the gatekeeper state revealing that state control remained limited and that the postcolonial state was an internally varied and often dissonant institution Second it transforms our understanding of postcolonial citizenship showing that its balance of rights and duties was neither claimed nor imposed but negotiated and differentiated Third it reorients Kenyan historiography away from central Kenya and elite postcolonial politics The result is a powerful investigation of experiences of independence of the meaning and form of development and of how global political practices were composed and recomposed on the ground in local settings

Regulating Business for Peace Jolyon Ford, 2015-02-05 This book addresses gaps in thinking and practice on how the private sector can both help and hinder the process of building peace after armed conflict It argues that weak governance in fragile and conflict affected societies creates a need for international authorities to regulate the social impact of business activity in these places as a special interim duty Policymaking should seek appropriate opportunities to engage with business while harnessing its positive contributions to sustainable peace However scholars have not offered frameworks for what is considered appropriate engagement or properly theorised techniques for how best to influence responsible business conduct United Nations peace operations are peak symbols of international regulatory responsibilities in conflict settings and debate continues to grow around the private sector's role in development generally This book is the first to study how peace operations have engaged with business to influence its peace building impact
