Lemza, 2021-09-29 Capitalizing on thousands of feet of accumulated footage captured by combat camera crews during the early years of the Korean War a small group of US Army officers conceptualized a film series that would widen viewers understanding of the service and its mission Their efforts produced the documentary television series that in late 1951 would become The Big Picture Although it would take years to fully utilize the emerging technologies and develop the concept into a popularly recognized television series The Big Picture did evolve into a vehicle whose intention was to help the army tell its story sell its relevance in the emerging Cold War and inform and educate its audience about American ideals Its messages captured the early post 1945 zeitgeist and reflected a national mood that was anticommunist steeped in foundational principles of American exceptionalism and trusting of elite leadership John W Lemza s The Big Picture argues that the show like others produced for television during that time by the armed forces served as a vehicle for directed propaganda scripted to send important Cold War messages to both those in uniform and the American public In this first systematic study of its production and reception history as well as its themes and cultural impact Lemza shows how the producers incorporated specific Cold War themes such as anticommunism into episodes and deployed television s small screen as the intersection of propaganda and policy during the Cold War period John Lemza s study reveals that the longer The Big Picture maintained those themes the more they began to lose their resonance especially when the cultural and social environment of the United States began changing in the mid 1960s The series producers chose to continue on a course that was set during the early Cold War years and the credibility of the show began to suffer Throughout

the course of its two decade production run however The Big Picture cast a big shadow as the premier military program influencing viewing audiences through primetime television and syndication

[The Wise Company](#) Ikujiro Nonaka,Hiroataka Takeuchi,2019-09-13 High velocity change is the fundamental challenge facing companies today Few companies however are prepared to continuously innovate because they focus on the short term and do not emphasize the wisdom needed to make sure that their interests are aligned with those of society Practical wisdom is the basis of continuous innovation where companies ceaselessly and repeatedly creating new

knowledge disseminating it throughout the organization and converting knowledge to action over time In The Wise Company legendary management experts Ikujiro Nonaka and Hirotaka Takeuchi highlight how various companies have confronted the challenge of rapid change to create new products and new ways of doing business that benefit employees consumers and society The key a relentless self renewal process where companies realize the future they envision rather than only responding to changes in the environment Nonaka and Takeuchi argue that while knowledge creating companies focusing on tacit and explicit knowledge can generate innovation they cannot create it on a continuous and ongoing basis without having wisdom about human interactions and how they influence organizational structures and practices Companies that have resilience longevity and sustainability share a number of characteristics Nonaka and Takeuchi show Strategies are based on alignment of organizational and societal benefits Leaders grasp the core of any situation or problem quickly and intuitively comprehend the nature and meaning of people things and events But wise leadership is not enough wisdom must infuse the organization through informal as well as formal shared interactions and communications that focus on metaphors and stories that convey the essence and meaning of strategies and actions In short Nonaka and Takeuchi demonstrate how continuous innovation results from companies ceaselessly and repeatedly creating new knowledge disseminating knowledge throughout the organization and converting that knowledge to action The Wise Company presents a new model of knowledge creation and practice for the twenty first century
