Seeing The Wider Picture:

Seeing the Bigger Picture Mark Sachleben, Kevan M. Yenerall, 2004 Sachleben political science Western New England College and Yenerall political science Clarion U hope to tap into the appeal of movies and television in order to raise interest in politics and illuminate features of contemporary political debates Topically arranging their material into chapters covering liberal and alternative ideologies the American presidency civil rights and social justice campaigns and elections and war the authors typically offer brief discussion of the broad outlines of their topic summarize some plots or plot points of movie or television show and then point towards its political relevance Annotation 2004 Book News Inc Portland OR booknews.com

Seeing the Big Picture Alastair T. Ferrie, 2012-10 To many Christians the Old Testament is a mysterious document a treasure hidden in the dust of antiquity It is historical it tells the story of ancient Israel but has it anything to do with me Seeing the Big Picture is the story of one man's voyage of discovery The Bible as a whole is the dramatic story of redemption which comes to a climax in the New Testament In every book of the Old Testament the theme of the coming of Christ is there burning brightly like a lamp in the darkness heralding the day when the glory of the Christ would burst majestically forth Suddenly I saw that this was truly one story It was almost as if someone had turned a light on I could see things much more clearly and so many aspects of the New Testament study were brought into such clear focus that I understood as never before

BEYOND RESILIENCE FROM MASTERY TO MYSTERY A Workbook for Personal Mastery and Transformational Change Stephen Murgatroyd, Sarajane Aris, 2017-01-31 People are actively engaged in a life search for meaning and this search can lead them to take a spiritual perspective of themselves and the world in which they live Some find this a spiritual journey a journey towards an inner path enabling a person to discover the essence of their being or the deepest values and meanings by which people live through art music or religion The ultimate purpose of our spiritual journey is to be an enabling meaning to be found and given for self and others In Tibetan Buddhism the ultimate intention and purpose of our personal and spiritual journey is to be of service and benefit to all beings and to bring all beings to enlightenment Enlightenment is the ultimate step on our journey whereby we go beyond our everyday consciousness to serve a greater whole where we are in touch with our ultimate true nature the essence of our being We can think of this journey to enlightenment as a journey both for personal mastery and beyond it

Seeing, second edition John P. Frisby, James V. Stone, 2010-04-02 An accessible yet rigorous and generously illustrated exploration of the computational approach to the study of biological vision Seeing has puzzled scientists and philosophers for centuries and it continues to do so This new edition of a classic text offers an accessible but rigorous introduction to the computational approach to understanding biological visual systems The authors of Seeing taking as their premise David Marr's statement that to understand vision by studying only neurons is like trying to understand bird flight by studying only feathers make use of Marr's three different levels of analysis in the study of vision the computational level the algorithmic level and the hardware implementation level Each chapter applies this approach to a different topic in vision by examining the problems the visual system encounters in interpreting retinal images and the constraints available to solve these problems the algorithms that can realize the solution and the implementation of these algorithms in neurons Seeing has been thoroughly updated for this edition and expanded to more than three times its original length It is designed to lead the reader through the problems of vision from the common but mistaken idea that seeing consists just of making pictures in the brain to the minutiae of how neurons collectively encode the visual features that underpin seeing Although it assumes no prior knowledge of the field some chapters present advanced material This makes it the only textbook suitable for both undergraduate and graduate students that takes a consistently computational perspective offering a firm conceptual basis for tackling the vast literature on vision It covers a wide range of topics including aftereffects the retina receptive fields object recognition brain maps Bayesian perception motion color and stereopsis MatLab code is available on the book's website which includes a simple demonstration of image convolution
