Seeing By Wireless The Story Of Baird Television:

Seeing by Wireless Ray Herbert, 1997 **Seeing by Wireless** Kirby L. McKinney, 1998 *The Birth of British Television* Mark Aldridge, 2017-09-16 When the BBC launched the world's first regular high definition television service on 2 November 1936 it was the culmination of decades of technological innovations. More than this however the service meant that the principle of television had finally found its place. *The Birth of British Television: A History* traces the early history and development of television from the experiments of amateurs to the institutionalised developments that led to the world's first regular high definition television service. Author Mark Aldridge provides a clear in depth and accessible introduction for those either exploring the period for the first time or seeking new insights into the beginnings of the industry. In tracing the origins and development of television Aldridge focuses on a number of important factors including the attitude of the press towards early television and examines the way that expectations of television changed over time prior to its official launch. Utilising new research this illuminating study examines how the aims for a new television service developed and the extent to which content and technology were linked. *The Birth of British Television* approaches this formative period from several perspectives from private individuals to the BBC and government while also examining the broader opinions at the time towards the new medium through press reports and feedback from the general public. Also included is an assessment of early programming which helps to offer a new and profound evaluation of the development of early television. Mark Aldridge is a Lecturer in Film and TV Studies at Southampton Solent University UK. He specialises in British television and both film and television history. His previous publications include *T is for Television* 2008 an analysis of the work of Russell T Davies co-written with Andy Murray. **AND THE WORLD LISTENED: The Story of Captain Leonard Frank Plugge and the International Broadcasting Company.** Keith Wallis, 2008 **Seeing by Electricity** Doron Galili, 2020-02-28 Already in the late nineteenth century electricians, physicists and telegraph technicians dreamed of inventing televisual communication apparatuses that would see by electricity as a means of extending human perception. In *Seeing by Electricity* Doron Galili traces the early history of television from fantastical image transmission devices initially imagined in the 1870s such as the Telectroscope, the Phantoscope and the Distant Seer to the emergence of broadcast television in the 1930s. Galili examines how televisual technologies were understood in relation to film at different cultural moments whether as a perfection of cinema, a threat to the Hollywood industry or an alternative medium for avant garde experimentation. Highlighting points of overlap and divergence in the histories of television and cinema Galili demonstrates that the intermedial relationship between the two media did not start with their economic and institutional rivalry of the late 1940s but rather goes back to their very origins. In so doing he brings film studies and television studies together in ways that advance contemporary debates in media theory. *A Post-Nationalist History of Television in Ireland* Edward Brennan, 2019-01-25 This book explores the question of how society has changed with the introduction of private screens. Taking the history of television in

Ireland as a case study due to its position at the intersection of British and American media influences this work argues that internationally the transnational nature of television has been obscured by a reliance on institutional historical sources This has in turn muted the diversity of audience experiences in terms of class gender and geography By shifting the focus away from the default national lens and instead turning to audience memories as a key source A Post Nationalist History of Television in Ireland defies the notion of a homogenous national television experience and embraces the diverse and transnational nature of watching television Turning to people s memories of past media this study ultimately suggests that the arrival of the television in Ireland and elsewhere was part of a long term incremental change where the domestic and the intimate became increasingly fused with the global

Restoring Baird's Image Donald F. McLean, 2000 Baird a British television pioneer experimented with video recording on gramophone discs in the late 1920s McLean a consultant has restored the surviving Phonovision discs and using computer techniques reminiscent of an archaeological dig has revealed the images on the discs and uncovered details of how the recordings were made McLean also restored amateur recordings of the BBC s 30 line Television Services 1932 1935 providing a glimpse at what viewers were then watching This book helps explain this period in television history Illustrated with historic photographs it sheds light on the achievements of Baird the development of video recording and the definition and invention of television itself c Book News Inc

H. G. Wells, Modernity and the Movies Keith Williams, 2007-12-01 This book investigates Wells s interest in cinema and related media technologies by placing it back into the contemporary cultural and scientific contexts giving rise to them It plugs a gap in understanding Wells s contribution to exploring and advancing the possibilities of cinematic narrative and its social and ideological impacts in the modern period Previous studies concentrate on adaptations this book accounts for the specifically proto cinematic techniques and concerns of Wells s texts It also focuses on contemporary film making in dialogue with his ideas Alongside Hollywood s later transactions it gives equal weight to neglected British and continental European dimensions Chapter 1 shows how early writings *The Time Machine* and short stories feature many kinds of radically defamiliarised vision These constitute imaginative speculations about the forms and potentials of moving image and electronic media Chapter 2 discusses the power of voyeurism absent presence and the disjunction of sound image reproduction implied in *The Invisible Man* and its topical politics updated in notable screen versions Chapter 3 extends this to dystopian warnings of systematic surveillance broadcasting of celebrity personae and post literate video culture in *When the Sleeper Wakes* a crucial template for urban futures on film Chapter 4 analyses Wells s belated return to screenwriting in the 1930s It accounts for his broadbrow ambition of mediating between popular and avant garde tendencies to promote his cause and its mixed results in *Things to Come* *The Man Who Could Work Miracles* etc Chapter 5 finally surveys Wells s legacy on both small and large screens It considers whether as well as being raided for scenarios for spectacular effects his subtexts still nourish an evolving tradition of alternative SF which duly critiques the innovations and applications of its host

media A History Of Early Television Vol 1 Stephen Herbert,2024-02-29 In the 21st Century broadcast television is an established part of the lives of many millions of people all over the world bringing information and entertainment directly into our homes The pieces in this volume date from 1879 to 1934 and consist of a selection of books articles and news items relating to the first developmental period of television before it became the ubiquitous medium that we know today The selection is English language material only History of Telecommunications Technology Christopher H. Sterling,George Shiers,2000-05-24 Lists some 2 500 English language works related to the history of major telecommunications technologies over the past 175 years In addition to having sections devoted to the various media of communication radio television the Internet etc the work covers institutional histories personal biographies general surveys and reference works This is an updated version of the 1972 work *Bibliography of the History of Electronics* Annotation copyrighted by Book News Inc Portland OR **The History of Broadcasting in the United Kingdom: Volume V: Competition** Asa Briggs,1995-03-23 Part of a five volume history of the rise and development of broadcasting in the United Kingdom The Wireless World and Radio Review ,1926 **Experimental Wireless & the Wireless Engineer** ,1926 **A History of the Future** Peter J. Bowler,2017-11-02 A wide ranging survey of predictions about the future development and impact of science and technology through the twentieth century Biographical Dictionary of the History of Technology Lance Day,Ian McNeil,2002-09-11 This Biographical Dictionary seeks to put the world of technology in the context of those who have made the most important contribution to it For the first time information has been gathered on the people who have made the most significant advances in technology From ancient times to the present day the major inventors discoverers and entrepreneurs from around the world are profiled and their contribution to society explained and assessed Structure The Dictionary presents descriptive and analytical biographies of its subjects in alphabetical order for ease of reference Each entry provides detailed information on the individual s life work and relevance to their particular field in the first part of the entry the information will include the dates and places of the subject s birth and death together with their nationality and their field of activity in the main body of the entry there follows an account of their principal achievements and their significance in the history of technology along with full details of appointments and honours finally an annotated bibliography will direct the reader to the subject s principal writings and publications and to the most important secondary works which the reader can consult for further information Special Features The first work in existence to examine technologists in detail Contains over 1 500 entries giving detailed information Extensive cross references enable the reader to compare subjects and build up a picture of technological advance Figures drawn from fields such as Aeronautics Telecommunications Architecture Photography and Textiles *The History of Broadcasting in the United Kingdom: Volume II: The Golden Age of Wireless* Asa Briggs,1995-03-23 First published 1975 Covers the period 1927 1939 from the BBC s establishment as a public corporation to the outbreak of war **Imagined Futures** Max Saunders,2019-10-22 This study provides the first substantial history and

analysis of the To Day and To Morrow series of 110 books published by Kegan Paul Trench and Tr bner and E P Dutton in the USA from 1923 to 1931 in which writers chose a topic described its present and predicted its future Contributors included J B S Haldane Bertrand Russell Vernon Lee Robert Graves Vera Brittain Sylvia Pankhurst Hugh McDiarmid James Jeans J D Bernal Winifred Holtby Andr Maurois and many others The study combines a comprehensive account of its interest history and range with a discussion of its key concerns tropes and influence The argument focuses on science and technology not only as the subject of many of the volumes but also as method especially through the paradigm of the human sciences applied to other disciplines and as a source of metaphors for representing other domains It also includes chapters on war technology cultural studies and literature and the arts This book aims to reinstate the series as a vital contribution to the writing of modernity and to reappraise modernism s relation to the future establishing a body of progressive writing which moves beyond the discourses of post Darwinian degeneration and post war disenchantment projecting human futures rather than mythic or classical pasts It also shows how as a co ordinated body of futurological writing the series is also revealing about the nature and practices of modern futurology itself

The History of Broadcasting in the United Kingdom: Volume IV: Sound and Vision Asa Briggs,1995 Part of a five volume history of the rise and development of broadcasting in the United Kingdom

The Columbia History of American Television Gary Richard Edgerton,2007 Richly researched and engaging The Columbia History of American Television tracks the growth of TV into a convergent technology a global industry a social catalyst a viable art form and a complex and dynamic reflection of the American mind and character Renowned media historian Gary R Edgerton follows the technological progress and increasing cultural relevance of television from its prehistory before 1947 to the Network Era 1948 1975 and the Cable Era 1976 1994 He considers the remodeling of television s look and purpose during World War II the gender racial and ethnic components of its early broadcasts and audiences its transformation of postwar America and its function in the political life of the country In conclusion Edgerton takes a discerning look at our current Digital Era and the new forms of instantaneous communication that continue to change America s social political and economic landscape

A History of Early Television Stephen Herbert,2004 In the 21st Century broadcast television is an established part of the lives of many millions of people all over the world bringing information and entertainment directly into our homes The pieces in this volume date from 1879 to 1934 and consist of a selection of books articles and news items relating to the first developmental period of television before it became the ubiquitous medium that we know today The selection is English language material only
