**Museums in Motion** Juilee Decker, 2024-08-06 This book explores the histories and functions of museums while also looking at the current standing of museums and their ongoing efforts toward relevance resiliency and future proofing Section I examines the beginnings of museums with chapters dedicated to art and design museums natural history and anthropological museums science museums museums focused history and the past and gardens zoos and children s museums Emphasis is on museums in the United States with some historical framing beyond the U S Section II explores the primary functions of museums including conservation exhibition interpretation engagement and service Section III examines museums from within by exploring critical issues and contemporary movements facing museums and our society transparency and openness labor and equity belonging and coalition building risk taking and risk aversion and sustainability and empathy Advocating for change rather than death to museums Museums in Motion demonstrates the very premise that museums have been in motion all along as they have shifted from their rather simple form of a treasury storehouse and tomb to something much more complex by deeply considering where museums have come from where they are today and where they are going Entirely new to this edition Section III Museum Aspirations features five new chapters each centered around topics rather than a museum type or museum function Each topic is meant to be a micro narrative and springboard for a conversation about museums today and their sustainability in the future The chapters examine museums

from the inside museum workers and their voices especially as well as power held by people and institutions and DEIA without using those individual words as chapter headings On their own or in conjunction with the chapters in the previous sections of this book these chapters serve as vignettes that can help readers to understand where how and why we need to apply critical lenses to institutions and articulate how doing so helps us to understand this historical moment and ultimately how we can realize resiliency and sustainability for museums and those who make their existence possible *Catalogue of the Public Documents of the ... Schwarzer shows us how museums are rooted in a contentious history tied to social technological and economic trends and ultimately changing ideas of what it means to be a citizen Along the way we meet some notorious and eccentric characters including business tycoons architects collectors designers politicians political activists and progressive educators all of whom have exerted their influence on what is a complex yet nonetheless enduring institution Major additions since the last edition include material on digital curation emergent exhibitions about civil rights immersive museum environments continuing efforts to diversify the field how museums role in our increasingly digital society and a new foreword by American Alliance of Museums President and CEO Laura L Lott Museums new to this edition include the National Museum of African American History and Culture the National Memorial for Peace and Justice and the 9 11 Memorial and Museum Beautifully written and lavishly illustrated the third edition of this accessible award winning book brings the reader up to date on the stories behind the people and events that have transformed America s museums from their beginnings into today s vibrant cultural institutions
