Passibility Wolff-Michael Roth, 2011-08-05 This book argues that the constructivist metaphor has become a self appointed overriding concept that suppresses other modes of thinking about knowing and learning science Yet there are questions about knowledge that constructivism cannot properly answer such as how a cognitive structure can intentionally develop a formation that is more complex than itself how a learner can aim at a learning objective that is by definition itself unknown how we learn through pain suffering love or passion and the role emotion and crises play in knowing and learning In support of the hypothesis that passibility underlies cognition readers are provided with a collation of empirical studies and phenomenological analyses of knowing and learning science in schools scientific laboratories and everyday life all of which defy a constructivist explanation The author argues that passibility constitutes an essential factor in the development of consciousness with a range of essential experiences that cannot be brought into the linguistic realm His exploration is guided by concepts such as otherness passion passivity and undecidability and concludes by resituating the construction metaphor to accord it its proper place in a more comprehensive theory of learning

Applied Cloud Deep Semantic Recognition Mehdi Roopaei, Peyman Najafirad (Paul Rad), 2018-04-09 This book provides a comprehensive overview of the research on anomaly detection with respect to context and situational awareness that aim to get a better understanding of how context information influences anomaly detection In each chapter it identifies advanced anomaly detection and key assumptions which are used by the model to differentiate between normal and anomalous behavior When applying a given model to a particular application the assumptions can be used as guidelines to assess the effectiveness of the model in that domain Each chapter provides an advanced deep content understanding and anomaly detection algorithm and then shows how the proposed approach is deviating of the basic techniques Further for each chapter it describes the advantages and disadvantages of the algorithm The final chapters provide a discussion on the computational complexity of the models and graph computational frameworks such as Google

Tensorflow and H2O because it is an important issue in real application domains This book provides a better understanding of the different directions in which research has been done on deep semantic analysis and situational assessment using deep learning for anomalous detection and how methods developed in one area can be applied in applications in other domains This book seeks to provide both cyber analytics practitioners and researchers an up to date and advanced knowledge in cloud based frameworks for deep semantic analysis and advanced anomaly detection using cognitive and artificial intelligence AI models

Spatial Resistance Christian Beck, 2019-01-11 *Spatial Resistance* Literary and Digital Challenges to Neoliberalism utilizes various literary and digital artifacts to show the potential and possibility of changing the ways we consider the spaces we inhabit As many spaces become increasingly privatized and policed it is necessary to contemplate ways in which corporate and state controlled spaces can not only be subverted but fundamentally changed to embrace the diverse lived experiences of all peoples Through an analysis of fictional and virtual spaces readers will be able to identify new ways to institute spatial change in everyday spatial lives in an effort to promote more democratic and equal experiences While this book uses primarily the philosophy of Gilles Deleuze and Félix Guattari to engender change it also provides practical examples to amend change or update the actions to suit particular needs and spaces This book shows that radical politics and the possibility of significant change can reside in just about any object or narrative it is the responsibility of the individual to take up the task of creating social change premised on equality liberty and solidarity
