Volume I: The Continuity of Latin Literature* Jan Papy,Wim Verbaal,Yanick Maes,2006-10-31 This volume deals with the question of the continuity of Latin literature throughout its history For the first time contributions are brought together from each of the three fields within the studies of Latin literature Classical Medieval and Neo Latin reflecting on problems such as the transmission of the Latin heritage the creation and perpetuation of a classical normativeness and the reactions against it The book is divided into three parts corresponding to the theoretical principle of organic development Beginnings Perfections Transitions thus questioning the validity of a similar evolutionistic model Because of the numerous points of contact between Latin and the national literatures the volume is of particular relevance for the studies of the European literary history Contributors include Davide Canfora Perrine Galand Hallyn Sander Goldberg Thomas Haye Marc van der Poel Michael Roberts Francesco Stella Wim Verbaal Gregor Vogt Spira and Jan Ziolkowski **Thinking In Patterns: Fractals And Related Phenomena In Nature** Miroslav M Novak,2004-03-09 Fractal geometry together with the broader fields of nonlinear dynamics and complexity represented a large segment of modern science at the end of the 20th century Penetration of the resulting new paradigms into practically all academic disciplines has confirmed the fundamental assertion

of universal formalism common to a wide range of human endeavors This book contains an extended article by B B Mandelbrot reviewing his contribution to fractal geometry and outlining some unsolved problems with illustrations especially of finance and physics It covers a range of multidisciplinary topics from the biology of aging through the self similar shape of plants image decompression and solar magnetic fields to sound reflection in the street The book is a treasure trove for innovative researchers working in fields related to fractal geometry The proceedings have been selected for coverage in Index to Scientific Technical Proceedings ISTP ISI Proceedings Index to Scientific Technical Proceedings ISTP CDROM version ISI Proceedings CC Proceedings Engineering Physical Sciences Fractals, Graphics, and Mathematics Education Michael Frame, Benoit Mandelbrot, 2002-06-20 Publisher Description Networking in Late Medieval Central Europe Beata Możejko, Anna Orłowska, Leslie Carr-Riegel, 2023-02-10 Exploring the formation of networks across late medieval Central Europe this book examines the complex interaction of merchants students artists and diplomats in a web of connections that linked the region These individuals were friends in business ventures occasionally families and not infrequently foes No single activity linked them but rather their interconnectivity through matrices based in diverse modalities was key Partnerships were not always friendship networks art was sometimes passed between enemies and families created for financial gain Taking an interdisciplinary approach the chapters focus on inclusion and exclusion within intercultural networks both interpersonal and artistic using a wide spectrum of source materials and methodological approaches The concept of friends is considered broadly not only as connections of mutual affection but also simply through business relationships Families are considered in terms of how they helped or hindered local integration for foreigners and the matrimonial strategies they pursued Networks were also deeply impacted by rivalry and hostility **Annals of Medical History**, 1928 **The Abel Prize** Helge Holden, Ragni Piene, 2009-12-01 The book presents the winners of the first five Abel Prizes in mathematics 2003 Jean Pierre Serre 2004 Sir Michael Atiyah and Isadore Singer 2005 Peter D Lax 2006 Lennart Carleson and 2007 S R Srinivasa Varadhan Each laureate provides an autobiography or an interview a curriculum vitae and a complete bibliography This is complemented by a scholarly description of their work written by leading experts in the field and by a brief history of the Abel Prize Interviews with the laureates can be found at <http://extras.springer.com> **The Legacy of Early Franciscan Thought** Lydia Schumacher, 2021-01-18 The legacy of late medieval Franciscan thought is uncontested for generations the influence of late 13th and 14th century Franciscans on the development of modern thought has been celebrated by some and loathed by others However the legacy of early Franciscan thought as it developed in the first generation of Franciscan thinkers who worked at the recently founded University of Paris in the first half of the 13th century is a virtually foreign concept in the relevant scholarship The reason for this is that early Franciscans are widely regarded as mere codifiers and perpetrators of the earlier medieval largely Augustinian tradition from which later Franciscans supposedly departed In this study leading scholars of both periods in the Franciscan intellectual tradition join

forces to highlight the continuity between early and late Franciscan thinkers which is often overlooked by those who emphasize their discrepancies in terms of methodology and sources At the same time the contributors seek to paint a more nuanced picture of the tradition's legacy to Western thought highlighting aspects of it that were passed down for generations to follow as well as the extremely different contexts and ends for which originally Franciscan ideas came to be employed in later medieval and modern thought

Islam and Politics in Indonesia Remy Madinier, 2015-08-31 The Masyumi Party which was active in Indonesia from 1945 to 1960 constitutes the boldest attempt to date at reconciling Islam and democracy. Masyumi proposed a vision of society and government which was not bound by a literalist application of Islamic doctrine but rather inspired by the values of Islam. It set out moderate policies which were both favourable to the West and tolerant towards other religious communities in Indonesia. Although the party made significant strides towards the elaboration of a Muslim democracy, its achievements were nonetheless precarious; it was eventually outlawed in 1960 for having resisted Sukarno's slide towards authoritarianism, and the refusal of Suharto's regime to reinstate the party left its leaders disenchanted and marginalised. Many of those leaders subsequently turned to a form of Islam known as integralism, a radical doctrine echoing certain characteristics of 19th century Catholic integralism which contributed to the advent of Muslim neo-fundamentalism in Indonesia. This book examines the Masyumi Party from its roots in early 20th century Muslim reformism to its contemporary legacy and offers a perspective on political Islam which provides an alternative to the more widely studied model of Middle Eastern Islam. The party's experience teaches us much about the fine line separating a moderate form of Islam open to democracy and a certain degree of secularisation from the sort of religious intransigence which can threaten the country's denominational coexistence.
