Post-Keynesian Essays from Down Under Volume IV: Essays on Theory G. Harcourt, Peter Kriesler, Joseph Halevi, John Nevile, 2019-03-15 Joseph Halevi G C Harcourt Peter Kriesler and J W Nevile bring together a collection of their most influential papers on post Keynesian thought Their work stresses the importance of the underlying institutional framework of the economy as a historical process and therefore of path determinacy In addition their essays suggest the ultimate goal of economics is as a tool to inform policy and make the world a better place with better being defined by an overriding concern with social justice Volume IV explores theory State, Market and Society in an Emerging Economy Quamrul Alam, Rizwan Khair, Asif M. Shahan, 2023-07-26 The economic and social development that Bangladesh has achieved in the past two decades has made Bangladesh a development paradox This book tries to explain this paradox through a political economy lens The book explains the linkages between the state changing society and emerging private sector and examines whether the social transformation taking place in Bangladesh has the potential to live up to the expectations of a middle income country The early part of the book unravels the myriad relations between the state society and market to project the aspirations of a newly independent nation It analyzes how political turmoil militarization of politics politicization of institutions reforms initiatives industrial and social development policies and the power nexus influenced the nature of the political economy of Bangladesh The book goes on to examine how domestic appetite for capital and raw materials the digital revolution and the capacity of the local market to absorb expanded economic activities have created an environment that catalyzes innovation and entrepreneurship The book also explains how the country has attempted to transform from an agrarian to a manufacturing based economy with rapid growth in the ready made garment industry pisciculture pharmaceuticals and the ICT sector Bangladesh's journey from an emerging economy towards a developed country would interest those researching on development economics and those in policy making A History of Economic Thought Lionel Robbins, 2000-10-16 Lionel Robbins's now famous lectures on the history of economic thought comprise one of the greatest accounts since World War II of the evolution of economic ideas This volume represents the first time those lectures have been published Lord Robbins 1898-1984 was a remarkably accomplished thinker writer and public figure He made important

contributions to economic theory methodology and policy analysis directed the economic section of Winston Churchill's War Cabinet and served as chairman of the Financial Times. As a historian of economic ideas he ranks with Joseph Schumpeter and Jacob Viner as one of the foremost scholars of the century. These lectures delivered at the London School of Economics between 1979 and 1981 and tape recorded by Robbins's grandson display his mastery of the intellectual history of economics, his infectious enthusiasm for the subject and his eloquence and incisive wit. They cover a broad chronological range beginning with Plato, Aristotle and Aquinas, focusing extensively on Adam Smith, Thomas Malthus and the classicals and finishing with a discussion of moderns and marginalists from Marx to Alfred Marshall. Robbins takes a varied and inclusive approach to intellectual history. As he says in his first lecture, 'I shall go my own sweet way, sometimes talk about doctrine, sometimes talk about persons, sometimes talk about periods.' The lectures are united by Robbins's conviction that it is impossible to understand adequately contemporary institutions and social sciences without understanding the ideas behind their development. Authoritative yet accessible, combining the immediacy of the spoken word with Robbins's exceptional talent for clear, well-organized exposition, this volume will be welcomed by anyone interested in the intellectual origins of the modern world.

Eastern Europe Since 1970 Bulent Gokay, 2015-12-22. From the hardening grip of Soviet domination under Brezhnev to the collapse of communism and its aftermath, Bulent Gokay provides the essential introduction to Eastern Europe in the last quarter of the twentieth century. The Soviet invasion of Czechoslovakia in 1968 spelt the end of reformist communism and the tightening of Soviet control throughout Eastern Europe. In spite of this, several countries within the Soviet Bloc managed to retain varying degrees of independence over the next two decades. Focusing on the struggle towards economic and social modernisation in the region and the competing influences of East and West in a dangerous Cold War, Bulent Gokay shows how individual circumstances and diverse national characteristics made a uniform application of the Soviet model impossible and charts the growing resistance to domination and the momentous events which finally toppled Soviet power in the region.

Social Classes in Marxist Theory Allin Cottrell, 2019-11-19. First published in 1984, this study critically examines the conceptions of social class employed by Marx and by modern Marxist writers to probe their problematic areas and to propose certain modifications to those conceptions. The author also tests the conclusions deriving from this theoretical reflection against the task of analysing some aspects of the development of class relations in a particular social formation in Britain. This title will be of interest to

Jackson, 2019-04-18 Defining markets has never been an easy task Despite their importance for economic theory and practice

they are hard to pin down as a concept and economists have tended to adopt simplified axiomatic models or rely on piecemeal case studies This book argues that an extended range of theory social as well as economic can provide a better foundation for the portrayal of markets The book first looks at the definition of markets their inadequate treatment in orthodox economic theory and their historical background in the pre capitalist and capitalist eras It then assesses various alternatives to orthodox theory categorised as social cultural structural functional and ethical approaches Among the alternatives considered are institutionalist accounts Marxian views network models performativity arguments field theories Austrian views and ethical notions of fair trade A key finding of the book is that these diverse approaches valuable as they are could present a more effective challenge to orthodoxy if they were less disparate Possibilities are investigated for a more unified theoretical alternative to orthodoxy Unlike most studies of markets this book adopts a fully interdisciplinary viewpoint expressed in accessible non technical language Ideas are brought together from heterodox economics social theory critical realism as well as other social sciences such as sociology anthropology and geography Anybody seeking a broad critical survey of the theoretical analysis of markets will find this book useful and it will be of great interest to economists social scientists students and policy makers

The Political Economy of Investment in Syria Linda Matar, 2016-02-26 Linda Matar examines Syria's failure to promote employment generating investment prior to the uprising Tackling the thorny issue of the inapplicability of modern investment theory to a developing country she situates the analysis of investment in Syria in its historical context and examines the socioeconomic structure and political preconditions that set the course of capital accumulation Matar argues that the class in charge of development which oversaw the allocation of resources during the Hafiz and Bashar Assad regimes precipitated a crisis of capital accumulation Difficult to access data and information compiled from fieldwork reveal how neoliberal reforms failed to build productive capacity and instead enriched a few through short term speculative and mercantile ventures Productive investment in Syria prior to the uprising lurched downward and the key related socio economic variables followed These deteriorating conditions contributed to the social explosion in 2011 Exploring the poor quality and quantity of investment this study probes how the cant of the free market served as a veneer behind which the institutional decisions distorted income distribution in a way that would inevitably lead to collapse

Capitalist Development in India's Informal Economy Elisabetta Basile, 2013-06-07 This book explores the economy and society of Provincial India in the post Green Revolution period It argues that the low quality of capital development in India's villages and small towns is the joint outcome of the informal economic organisation that is strongly biased in favour of capital and of the complex stratification of the workforce along class and caste lines Focusing on the processes of growth induced by the introduction of the high yield varieties in agriculture the book demonstrates that a low road pattern of capitalist development has been emerging in provincial India firms compete over price and not over efficiency with a constant pressure to reduce costs in particular labour costs The book shows that low skilled employment prevails and low

wages and poor working conditions are widespread Based on original empirical research the book makes a valuable contribution to the debate on varieties of capitalism in particular of the Global South It is of interest to academics working in the fields of Development Studies Political Economy and South Asian Studies
