these countries since the mid 1990s via international development support from international organizations and developed countries including Japan In particular the emphasis has been on the area of civil law where the main subject of Japan's support has been centered on the civil code and civil procedure code The legal system of the recipient country is complicated by the crisscrossing of the remnants of previous eras from the inherent laws that have existed since before colonization the laws of the colonial powers that were introduced during the colonial era French law in Cambodia Laos and Vietnam English law in Myanmar the influence of socialist law after independence from colonization and the path of modern industrialization and development such that one country's legal system is the combination of all of these influences For the reader to understand the dynamics of these changing laws each chapter of the book combines two methodological perspectives The first is to ascertain the spatial range as to how far the civil law extends across social phenomena The second is a historical perspective in which the trends in legal changes will be understood on a time axis
