Rethinking Intellectual Property Gustavo Ghidini, 2018 Intellectual property law is built on constitutional foundations and is underpinned by the twin freedoms of freedom of expression and freedom of economic enterprise In this thoughtful evaluation Gustavo Ghidini offers up a reconstruction of the core features of each intellectual property paradigm including patents copyright and trademarks suggesting measures for reform to allow intellectual property to become socially beneficial for all

Innovation, Competition and Consumer Welfare in Intellectual Property Law Gustavo Ghidini, 2010-01-01 Professor Ghidini has long since made himself a worldwide reputation as a leading scholar He is a profound critic of intellectual property protection that follows rigid property logic and favours the functionalist competition innovation logic Innovation Competition and Consumer Welfare in Intellectual Property Law is truly enriching reading Hanns Ullrich College of Europe Bruges Belgium We in the United

States have much to learn not only from Gustavo Ghidini's careful analysis of modern trends in the European IP regime but also from his thoughtful development of the thesis that free competition should be understood as the overarching principle guiding both IP protection and what we call antitrust law. Rudolph J. R. Peritz, New York Law School, US, and author of *Competition Policy in America*. This authoritative book provides a comprehensive critical overview of the basic IP paradigms such as patents, trademarks, and copyrights. Their intersection with competition law and their impacts on the exercise of social welfare are analysed from an evolutionary perspective. The analyses and proposals presented encompass the features and rationales of a legal field in constant evolution and relate them to increasingly rapid technological, economic, social, and geopolitical developments. Gustavo Ghidini highlights the emerging trends that challenge the traditional, all-exclusionary vision of IP law and its application. The author expertly combines holistic, evolutionary, and constitutionally oriented approaches with the search for a rebalancing of the IP rights holders' positions with citizens and users' rights. This book will appeal to academics, scholars, and lawyers specializing in the realm of intellectual property, competition, and comparative law.

Ownership of Knowledge Dagmar Schafer, Annapurna Mamidipudi, Marius Buning, 2023-07-18. A framework for knowledge ownership that challenges the mechanisms of inequality in modern society. Scholars of science, technology, medicine, and law have all tended to emphasize knowledge as the sum of human understanding and its ownership as possession by law. Breaking with traditional discourse on knowledge property as something that concerns mainly words and intellectual history, or science and law, Dagmar Sch fer, Annapurna Mamidipudi, and Marius Buning propose technology as a central heuristic for studying the many implications of knowledge ownership. Toward this end, they focus on the notions of knowledge and ownership in courtrooms, workshops, policy, and research practices while also shedding light on scholarship itself as a powerful tool for making explicit the politics inherent in knowledge practices and social order. The book presents case studies showing how diverse knowledge economies are created and how inequalities arise from them. Unlike scholars who have fragmented this discourse across the disciplines of anthropology, sociology, and history, the editors highlight recent developments in the emerging field of the global history of knowledge as science, as economy, and as culture. The case studies reveal how notions of knowing and owning emerge because they reciprocally produce and determine each other's limits and possibilities: that is, how we know inevitably affects how we can own what we know, and how we own always impacts how and what we are able to know.
