Seventh Millennium The Evidence That We Can Know The Future:

The Seventh Millennium John Ashton,1998 For thousands of years humans have wondered about the future often looking for portents in the moon and stars or in other signs of nature Scientific studies have seemed to confirm that some people have the ability to see the future with varying degrees of accuracy This opens a whole new arena of human knowledge that affects our lives If the future exists do we really have freedom of choice Can we change it if we don t like certain aspects And can the prophecies for the next millennium provide the clues for pathways to our achieving the best future for ourselves and our children This work seeks to put together the fascinating puzzle of the future which suggests that our choices now affect what is going to happen

Evolution Impossible John Ashton,2012-06-23 There is scientific evidence proving evolution cannot be responsible for life on Earth It is time to question what biology text books and nature documentaries claim about our origins Even Darwin admitted I threw out queries suggestions wondering all the time over everything and to my astonishment the ideas took like wildfire People made a religion of them Dr John Ashton has dedicated 40 years to teaching and researching science and exposing the lack of proven evidence for Darwin s theories In Evolution Impossible he uses discoveries in genetics biochemistry geology radiometric dating and other scientific disciplines to explain why the theory of evolution is a myth Discover for yourself Why the fossil record is evidence of extinction not evolution How erosion and sedimentation dates conflict with radiometric dating How the lack of transitional fossils undermines evolutionary notions Why living cells and new organisms do not rise by chance or random mutations Regardless of your level of scientific education you will finish this book able to cite 12 reasons why evolution cannot explain the origin of life

Scotland's Future History Stuart McHardy,2015-04-06 McHardy presents a new approach to history changing our mindset to look at Scotland as the centre of our story Rather than starting from the Mediterranean from the classical Christian bias we have been taught for centuries Rather than being a remote dark land populated by barbaric tribes Perhaps we were the centre of a well organised civilisation around the Orkneys and islands and coasts and rivers with our own priorities community centred locally self sufficient well versed in lore of all kinds Who were are we The great centres of ritual in Orkney Lewis and Kilmartin suggest an indigenous population much more sophisticated in terms of social ritual and communal rule than we have been led to believe In whose interest is it that we accept the classical Christian version of history relayed to us by monks These are some of the questions McHardy addresses in a passionate and accessible style Read and become more Alba centric in terms of what we see as important to research study and understand Signs from the Future Santiago Zabala,2025-10-28 We are constantly being warned but we seldom heed warnings Cautioned about authoritarian leaders climate change technological dystopias or other catastrophes we fail to take action or even take them seriously Too often warnings are dismissed much like the artists scientists environmentalists and intellectuals who deliver them Why don t we listen Santiago Zabala asks us to think of philosophy as a warning a call to heed ominous signs from the future He argues that warnings as distinct from predictions invite us to see the possibility of a radical break from the present Predictions tell us to submit to the inevitable but warnings ask us to take part in shaping a different future A philosophy of
